

Analyzing Communities based on Chicago crime rate and venues

Introduction

Chicago is one of the largest cities of the United States with a population of over 2 and a half million people. Chicago has 77 communities grouped into 9 districts. The city has reported more than 7 million crimes of every category since 2001, 259 thousand just in 2019.

Business Problem

This capstone project deals with the decision of "Which community has had the least crimes in 2019", finding the right community to move into or beginning a business entrepreneurship based on the security and venue density in each community.
